

Process Book Group - 0

Data set contains

- room type
- lng, lat
- price
- Boroughs
- host name
- : etc.

Data: Airbnb
URL: insideairbnb.com

Lavanya \Rightarrow ggplot2

Su \Rightarrow word clouds

KJ \Rightarrow Geospatial

Arman \Rightarrow Geospatial

< NYC Data set >

} Make each boroughs

It would be interesting
observe each borough

Word Cloud

Reviews
w/
good ; bad

i.e.

Lat
Dirty heat
Clean
bed bad

Geo - chowpleth

mostly
would be
in
Manhattan.

Interactive? ggmap.
leaflet?

Seasonal Change booking -

I possibly
observe some
pattern
such as
Vacation Seasons

of list occupancy revenue —

in 2019

e.g. 2 M total

in 2020

0.7 M total
